Packaging System

**FALCON TEST ENGINEERS REPORT No:** 3032

### ASSEMBLY & CONFIGURATION OF PACKAGING:

Place the filled inner packaging into the box. Add the required amount of absorbent material for liquid dangerous goods if specified. Seal plastic bag with a "goose-neck tie" (twist slack of bag tightly, fold over so that it forms a neck, and secure with elastic bands). Tuck neck into box. Fill void to stabilise the content. Close and seal the box with 48 mm pressure sensitive self adhesive tape in the same manner that the base of the box has been sealed. Label the box as required.

(Make sure that the labels or any other markings are not obliterated or obscured in any way).

Note: The use of other packaging methods or components may render the approval of this package invalid.
