Packaging System

FALCON TEST ENGINEERS REPORT No: 3031

ASSEMBLY & CONFIGURATION OF PACKAGING:

Place filled inner packagings into the 4.5 L PET intermediate packaging drum. Add sufficient amount of absorbent material if required. Close the drum with the lid and apply self-adhesive PVC tape as a secondary means of security.

Insert the drum into the fibreboard box and fill any void with shredded paper to prevent movement. Close and seal the box using 48 mm pressure sensitive self-adhesive tape in the same manner that the base of the box has been sealed. Label the box as required.

Note: The use of other packaging methods or components may render the approval of this package invalid.
