FALCON TEST ENGINEERS REPORT No .:

4174

CONFIGURATION OF PACKAGING:

Four absorbent pads and the re-sealable plastic bag are placed inside the **'Hazpak'** Medi-pouch. The pouch is sealed following printed instructions and rolled lengthways and placed inside the EPS insulating box and closed. Close and seal the fibreboard box with 48 mm pressure sensitive self adhesive tape in the same manner that the base of the box has been sealed. Add the required amount of absorbent material if specified. Label the box as required.

If using dry ice, the box should be pierced in the position marked to allow for venting.

(Make sure that the labels or any other markings are not obliterated or obscured in any way)

Note: The use of other packaging methods or components may render the approval of this package invalid.
