Packaging System

FALCON TEST ENGINEERS REPORT No: 2835

CONFIGURATION OF PACKAGING:

Place the filled inner packagings into the box. For liquid, secure screw closure with self adhesive PVC tape. Ensure that they are in a stable upright position. Place 2 x top foam stabilising inserts over the inner packagings. Seal plastic bag with a "goose-neck tie". (Twist slack of bag tightly, fold over so that it forms a neck, and secure with elastic bands). Tuck neck into box. Close and seal the box with 48 mm pressure sensitive self adhesive tape in the same manner that the base of the box has been sealed. Add the required amount of absorbent material if specified. Label the box as required.

(Make sure that the labels or any other markings are not obliterated or obscured in any way).

Note: The use of other packaging methods or components may render the approval of this package invalid.

MARKINGS & APPROVAL:

Approval No.: 60083
UN Markings: UN 4G/Y17.5/S###AUS/VB60083
Packaging Group: II & III
S.G.: 1.6
Internal Test Pressure: 180 kPa

PRODUCT DIMENSIONS:

Dimensions: 275 (L) x 195 (W) x 300 (H) mm **Mass of Empty Package:** 1050g
Nominal Volume 0.016 m³ per unit
Bulk Equivalent: 4 kg (@ 250 kg/m³)
