#### ASSEMBLY & CONFIGURATION OF PACKAGING:

Place the filled inner packaging into the box. Ensure that it is in a stable upright position and that it is seated firmly on the base 'X' insert. Place the top cross 'X' insert over the inner packaging. Close plastic bag with a "goose-neck tie". (Twist slack of bag tightly, fold over so that it forms a neck, and secure with elastic bands). Tuck neck into box. Close and seal the box with 48 mm pressure sensitive self-adhesive tape in the same manner that the base of the box has been sealed. Add the required amount of absorbent material if specified. Label the box as required.

**(Make sure that the labels or any other markings are not obliterated or obscured in any way).**

Note: The use of other packaging methods or components may render the approval of this package invalid.
