Combination Package

FALCON TEST ENGINEERS REPORT No: 4712

ASSEMBLY & CONFIGURATION OF PACKAGING:

Place the filled inner packagings into the box. Ensure that they are in a stable upright position. Place the foam inserts over the cans to fill void space. Seal plastic bag with a "goose-neck tie". (Twist slack of the bag tightly, fold over so it forms a neck, and secure with elastic bands). Tuck neck into box. Close and seal the box with 48 mm pressure sensitive self adhesive tape in the same manner that the base of the box has been sealed. Add the required amount of absorbent material if specified. Label the box as required.

(Make sure that the labels or any other markings are not obliterated or obscured in any way).

Note: The use of other packaging methods or components may render the approval of this package invalid.
